

PhD (Management)

This programme focuses highly on an original contribution to academic literature or research in a specific discipline of business. Look forward to a thorough understanding of theoretical underpinnings and their applications, with an ability to think in a systematical way and apply quantitative techniques to business related problems.

We aspire to train you to be highly skilled scholars in conducting research and teaching for careers where intensive research skills and analytical capabilities are required.

Want to further enhance your knowledge, skills and abilities obtained at master's level and gain the ability to conduct independent research? It's possible through formal courses, seminars, independent studies, examinations, written papers, workshops, presentations and the dissertation.

At IIBM, you can focus on one of the following broad areas. Finance, Accounting, Human Resource Management, Organization Behavior, Strategic Management, Business Administration, Marketing and Operations Management to conduct their research as their field of study.
